

# YOUTH4CLIMATE & PRE-COP26

PRESENTAZIONE DI CARLA GIORDANO

# CHE COSA SONO?

Sono delle conferenze che affrontano le principali urgenze e priorità dell'azione per il clima.

partecipano attiviste, ricercatori universitari, esperte di marketing, influencer, ingegneri, studenti e studentesse di liceo

L'obiettivo è definire un accordo sul ruolo dei giovani nei negoziati ufficiali, con una serie di richieste di azioni concrete, dalla decarbonizzazione di settori come moda, turismo, sport

# GRETA THUNBERG E VANESSA NAKATE

L'attivista africana racconta di aver assistito alla tragedia delle alluvioni che hanno fatto vittime e morti in Uganda. Parla visibilmente emozionata del suo Paese che "sta cambiando velocemente. L'Africa è la più bassa per emissioni eppure paga pesantemente la crisi climatica.

Greta Thunberg lascia intendere che la lotta alla crisi climatica, se concreta, può trasformarsi in risorsa, speranza. Ma per farlo non bisogna più parlare, bisogna agire. Finora le nostre richieste e ambizioni sono state tradite, si continuano ad aprire impianti legati ai combustibili fossili, le emissioni crescono, i potenti non ci stanno ascoltando.

# LE 4 RICHIESTE

*L'assemblea dei giovani della "Youth4Climate" ha approvato i "key messages", articolati su 4 argomenti fondamentali:*

- Ambizione climatica*
- Ripresa sostenibile*
- Coinvolgimento degli attori non governativi*
- Società più consapevole delle sfide climatiche.*

# STUDY OBJECTIVES

## MARS

It's the closest planet to the Sun and the smallest one

Despite being red, Mars is actually a cold place

## VENUS

Venus is the second planet from the sun and it is very hot

# LITERATURE REVIEW

## BIO THERMOSTAT

Mercury is the closest planet to the Sun

## CLOUD FORMATION

Venus is the second planet from

## GREENHOUSE GASES

Mars is actually a very cold place

## OCEAN CURRENT

Jupiter is the biggest planet of them all

## PLANETARY MOTION

Saturn is a gas giant and has rings

## SOLAR VARIABILITY

Neptune is the farthest planet from the sun

# INDICATORS

## MERCURY

It's the closest planet  
to the Sun

30,000

## VENUS

Venus has a beautiful  
name, but it's hot

5,678

## MARS

Mars is actually a very  
cold place

65,700

# MOST AFFECTED COUNTRIES

## HAITI

Jupiter is the biggest planet

80%

Here you can write something relevant

## PAKISTAN

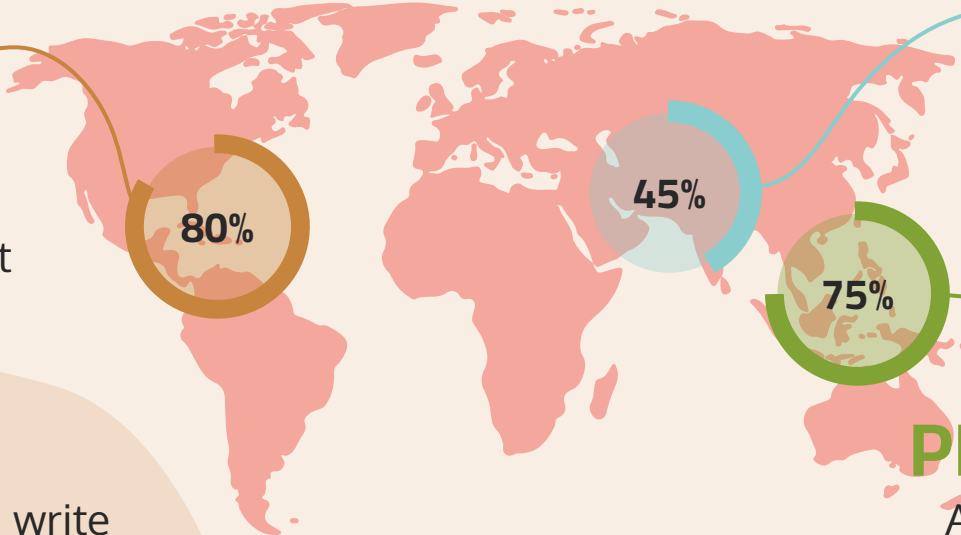

Mercury is the smallest one

45%

75%

## PHILIPPINES

Although being red, Mars is a cold place

# 2.32° F

That's how much higher Earth's average temperature was in 2020 compared to the late 1800s

# CONSEQUENCES OF CLIMATE CHANGE

Images reveal large amounts of data, so remember: use an image instead of a long text. Your audience will appreciate it

# CONCLUSIONS

## VENUS

Venus has a beautiful name and is the second planet from the Sun

## MERCURY

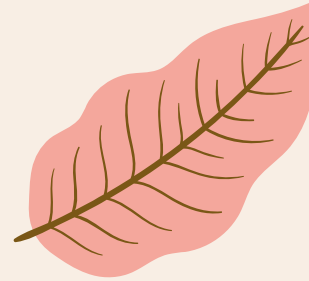

Mercury is the closest planet to the Sun and the smallest one
